## INTERESTS

Software Development using the latest edge of the technologies like Ruby, NodeJS, Elixir and expanding my skills in DevOps like Chef, Ansible, Vagrant, Docker and FrontEnd.

## WORK EXPERIENCE

### GameHouse

Software Developer, 2013 - current

- ▶ Developing the application using Ruby on Rails, NodeJS, MongoDB, Redis, AngularJS.
- ▶ Working on the deployments tasks. Learning Ansible and Docker for building container based hosts.
- ▶ Developing the advertisement platform for the mobile devices.
- ▶ Brainstorm and prototype the new approach for some parts of the application.
- ▶ Writing specs and cucumber scenarios for integration tests for our API endpoints.

### RubyRoid Labs

Software Developer, 2013 - 2014

- ▶ I was working on document generation system. The project includes document generation, task management for Police Department, Hospitals, ect. Used Ruby on Rails, PostgreSQL, AngularJS

### Itransition

Ruby on Rails Developer, 2012-2013

- ▶ As Ruby developer I was working on mobile advertising platform for back-end, front-end and mobile clients API for iOS and Android. The project is intended to increase sales for businesses by providing discounts. Using Ruby on Rails, MySQL, Redis, Sidekiq, Faye, Pushover.
- ▶ As Ruby developer I was working on online auction system. Full auction workflow support (from creating to send notification about winnign beds). Dealing with admin panel, server back-end for real-time bid system. Using Ruby on Rails, Redis, MySQL, Faye, MongoDB, Rescue
- ▶ As Ruby developer I was working on Social Media Aggregation System. It aggregates data by keywords from Facebook, Twitter, Sysomos(15+ servises), Google News, Google Blogs, Youtube, Google Images and Vocus(Print media and Blogspot). Dealing with main aggregation gateways, alert system(sms, email), report system(pdf, plain text, html). Used Ruby on Rails, MySQL, Facebook, Twitter, Klout APIs.

## EDUCATION

### Belarussian State of Informatics and Radioelectronics

B.S. in Computer Science, May 2014

## SKILLS

Very experienced with Ruby, JavaScript.

Ruby on Rails 2-4, NodeJS, Elixir, AngularJS, RSpec, Cucumber, MongoDB, PostgreSQL

Using RSpec, Cucumber and other unit tests libraries

Using Vim / Tmux for the development
