INTERESTS

Software Development using the latest edge of the technologies like Ruby, NodeJS, Elixir and expanding my skills in DevOps like Chef, Ansible, Vagrant, Docker and in front-end like AngularJS, EmberJS, ReactJS.

WORK EXPERIENCE

GameHouse

Software Developer, 2013 - current

- ▶ Developing the application using Ruby on Rails, NodeJS, MongoDB, Redis, AngularJS.
- ▶ Working on the deployments tasks. Learning Ansible and Docker for building container based hosts.
- ▶ Developing the advertisement platform for the mobile devices.
- ▶ Brainstorm and prototype the new approach for some parts of the application.
- ▶ Writing specs and cucumber scenarios for integration tests for our API endpoints.

RubyRoid Labs

Software Developer, 2013 - 2014

- ▶ Document generation system. The project includes document generation, task management for Police Department, Hospitals, ect. Technologies: Ruby on Rails, PostgreSQL, AngularJS, Elasticsearch

Itransition

Ruby on Rails Developer, 2012-2013

- ▶ Mobile advertising platform for back-end, front-end and mobile clients API for iOS and Android. The project is intended to increase sales for businesses by providing discounts.

Technologies: Ruby on Rails, MySQL, Redis, Sidekiq, Faye, Pushover.

- ▶ Online auction system. Full auction workflow support (from creating to send notification about winnign beds). Dealing with admin panel, server back-end for real-time bid system. Technologies: Ruby on Rails, Redis, MySQL, Faye, MongoDB, Rescue
- ▶ Social Media Aggregation System. It aggregates data by keywords from Facebook, Twitter, Sysomos (15+ servises), Google News, Google Blogs, Youtube, Google Images and Vocus (Print media and Blogspot). Dealing with main aggregation gateways, alert system (sms, email), report system (pdf, plain text, html). Technologies: Ruby on Rails, MySQL, Facebook, Twitter, Klout APIs, Elasticsearch

EDUCATION

Belarussian State of Informatics and Radioelectronics

B.S. in Computer Science, May 2014

SKILLS

Ruby (Sinatra, Grape, Ruby on Rails 2-4), Elixir, Javascript (AngularJS, EmberJS, ReactJS), MySQL, MongoDB, PostgreSQL, Elasticsearch

RSpec, Cucumber, MiniTest

Vim / Tmux for the development
